SWISSCI LCP Modular

The SWISSCI LCP Modular range aims to offer more flexibility to the membrane protein crystallographers LCP experiment. There are three choices of LCP Bases which are combined with one of five pre-affixed LCP Double Sided Pressure Adhesives. The Pressure Adhesives are of varying thickness and well dimensions. To complete the LCP sandwich plate there is a choice between two sizes of Cover Glass or three UVP Cover Films that are of varying thickness.

LCP Sandwich Options:

LCP Bases: SBS XPOL Glass Base, Glass Base and UVXPO Plastic Base

Spacers: 60 μ m, 100 μ m, 120 μ m, 200 μ m. **Well sizes:** 5.5 mm and 7 mm.

Covers: Cover Glass, Large Cover Glass, 40 μ m Cover Film, 100 μ m Cover Film, 200 μ m Cover film covers
